Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-14 have been examined.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 6 are rejected under 35 USC 102(e) as being anticipated by **Nordenstam et al** (US 6,442,615).

-Regarding claims 1 and 6, **Nordenstam et al** discloses a method of allocating network resources, the method comprising: creating a model of a plurality of network nodes ("a network modeling unit (14, 16) to model the network through a virtual network having virtual links without capacity restrictions imposed thereon: (see abstract), determining an arc capacity for each commodity of a plurality of commodities; determining a maximum flow of the commodity; updating a link load; and mapping a solution on the network resources (provided a network load evaluation means 18) to map the real traffic flow onto the virtual network assuming optimal routing and compare the capacity used for each virtual link with the capacity assigned thereto." (Column 5, lines 13-20).

Allowable Subject Matter

4. Claims 11-14 are allowed.
5. Claims 2-5, 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to teach or render obvious the method of claim 1, wherein the model includes: setting a plurality of ingress nodes to a plurality of demand nodes; setting a plurality of egress nodes to a plurality of supply nodes; and setting a plurality of flow units of a demand and supply pair to a number of trunks between a corresponding ingress and egress pair.
